Hello, I'm Myktybek.
This is my Website.
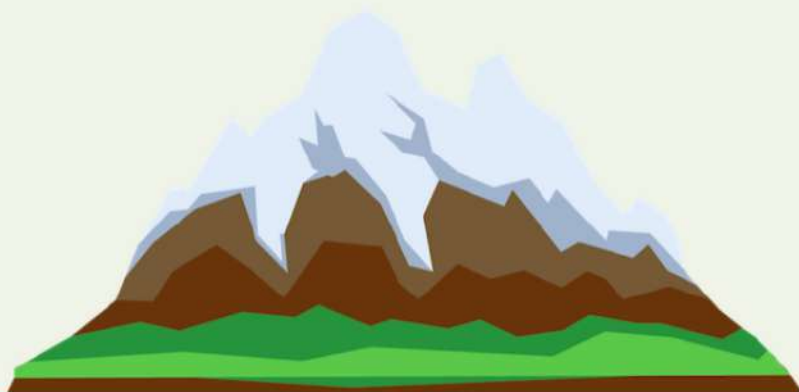

I am Computer Science student and Junior Web
Developer located in Budapest, Hungary. I like
learning new technologies and creating
Websites.

Web Development

I am self-taught Web Developer. I have
learned Javascript from bootcamp at
Udemy.com

C/C++ Programming

Learned writing simple programs using C++.
Moreover, C++ is one of my favorite tools when
programming due to its power and syntax.

Aitmatov High School is school which was founded by Turkish inverstors in 1992. The duration of this schools is 5 years. This is the place that I got interested in Computers. I am glad that I had opportunity to study there.

I am pursuing my Bachelor's at Eötvös Loránd University. Majoring in Computer Science is hard but also it is a fascinating area. To me, Budapest is a very good city to visit, because of the variety of cuisine and special culture.

Name	Degree	Year
Aitmatov High School	High School Diploma	2016-2021
Eotvos Lorand University	Bachelor's	2021-2023
